

Blink Optometry – Fundus Photography Consent & Acknowledgment

See more. Know more. Protect your vision.

At Blink Optometry, your eye health is our top priority. That's why we offer **high-resolution retinal imaging (fundus photography)** as part of your comprehensive eye exam.

This advanced imaging technology allows us to:

- Capture a **detailed image of the back of your eye (retina)** without dilation (in most cases)
- Establish a **baseline for future comparisons** to detect changes early
- Identify early signs of conditions like **diabetes, high blood pressure, macular degeneration, glaucoma**, and more — **often before symptoms arise**
- Maintain a **permanent visual record** of your retinal health for ongoing care

Unlike a traditional exam alone, this image allows us to see more and helps you understand more about your eye health today and into the future.

This is a recommended part of your care.

While not always covered by vision insurance, most patients choose to include retinal imaging due to its long-term value. The fee for routine fundus photography is **\$25** and is due at the time of service.

Acknowledgment & Consent

☐ **YES, I would like to include high-resolution retinal imaging (fundus photo) with my exam today.**

☐ **NO, I decline fundus imaging at this time. I understand that this may limit our ability to detect early retinal changes.**

Patient Name: _____

Date of Birth: _____

Signature: _____

Date: _____

Thank you for choosing Blink Optometry – we're excited to care for your vision today and for years to come.
